BRAVERY the most natural food

Because we know your pet's food and health are the most important.

The Bravery brand belongs to the **Alinatur** company, the family has more than 70 years of experience in the animal feed sector.

The company is located in Lorca (Region of Murcia), a place rich in agricultural and livestock resources that allow it to have the best raw materials on the market thanks to its local suppliers. This has allowed a great commercial expansion being currently one of the main companies in the national pet food sector and being present internationally in more than 70 countries.

Our philosophy is based on 4 main principles:

Natural ingredients

We carefully select natural and quality ingredients, thus providing the highest nutritional value to our recipes, which allows us to keep your pet in the best health conditions.

We only use natural raw materials to achieve optimal palatability without adding preservatives or artificial additives. We have replaced artificial preservatives with natural preservatives, extracted from vegetable oils and plants. .

Local suppliers

Being located in an area rich in agricultural and livestock resources allows us to have the best raw materials on the market, thanks to our commitment to local suppliers.

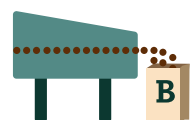

Experience

ALINATUR is a family company with more than 70 years of experience in the animal feed sector that over the years has specialized in the manufacture of quality food for cats and dogs.

Differentiation

Thanks to our commitment to produce products with the highest quality, we have managed to differentiate ourselves by creating **BRAVERY**, a brand of the highest quality suitable for the nutritional requirements according to the age and size of the pet.

- 1 We carefully select and analyze all our raw materials.
- 2 Thanks to our local suppliers, we obtain the best products.
- 3 Our facilities are equipped with the latest technology (in machinery), in addition to complying with the highest standards of quality and food safety.
- 4 All our products are made with the best ingredients without the addition of artificial ingredients, which guarantees optimal palatability.

Our Mission and Vision

MISSION

To manufacture healthy products allowing us to take care of our pets with the highest quality and food security.

VISION

To improve the quality of life of our pets in any household in the world, with food products more and more natural and of greater quality.

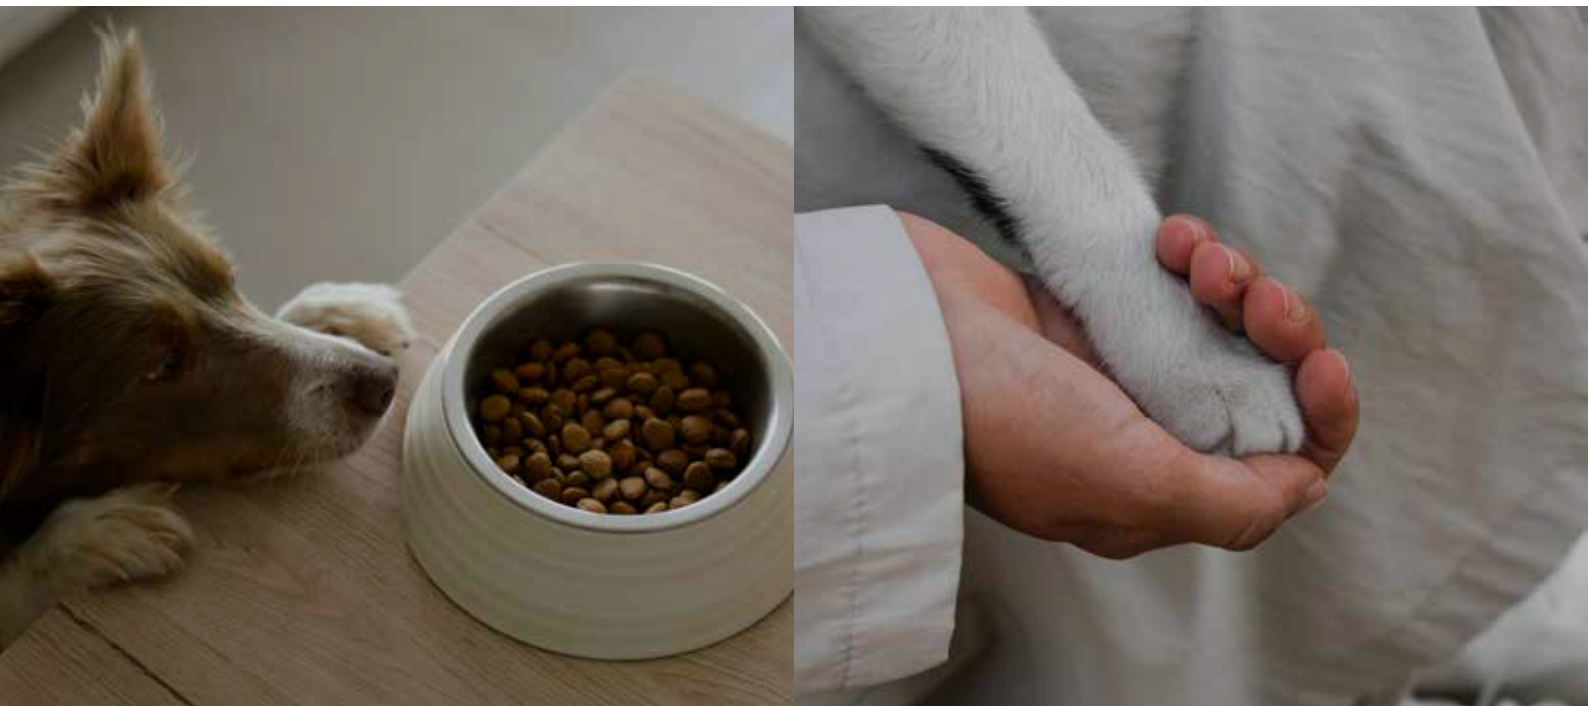

Alinatur Values

PASSION

Passion makes us develop the best products.

COMMITMENT

Commitment drives us to better ourselves day by day.

Alinatur Values

TRANSPARENCY

We manufacture natural products without the need to use any artificial ingredients.

FAMILY

There is nothing more rewarding than love and affection of our loved ones.

INNOVATION

Ideas are our distinction.

RESPECT

We promote the respect for all the people and groups that might influence the improvement of pets' living conditions.

We manufacture our own Products

We are manufacturers

We have factories for dry food, wet food and snacks. This allows us to be a global manufacturer in the pet food industry.

Quality

We work only with natural ingredients carefully selected from local suppliers. The raw materials used to produce our products come from companies that supply food for human consumption.

Technology

Our production plant has a high degree of automation and the most advanced technology in the industry. All products are developed in our high-tech facilities. Giving a new approach to pet nutrition, offering food of higher nutritional value, naturalness and taste.

Human Team

We have a great multidisciplinary team of professionals in each of its areas. This allows us to continue innovating and advancing to ensure the quality of life of our best friends.

Cruelty Free Research

ALINATUR manifests itself and takes a stand against animal abuse. ALINATUR contributes its grain of sand by collaborating with different organizations and animal shelters so that they can feed these pets that are in disadvantaged situations of welfare and health.

Environmental Sustainability

Our love and care for the environment are present in every step we take; that is why we are committed to environmental protection and improvement initiatives.

+ More wood saving: 54,004 dm³

+ more than 52 TREES

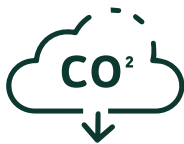

We contribute to the improvement of the environment by reducing wood consumption by more than 52 trees.

+ Reduction of waste by 5,937 kg

+ more than 5,937 PEOPLE

We contribute to the reduction of daily waste

+ more reduction of emissions 63,340 kg

+ more than 60,584 KM BY TRUCK

We contribute to reduce the environmental impact thanks to CO2 reduction

A 100% renewable energy source

We use green energy, a 100% renewable energy source.

Sustainability Certificates:

Quality Ingredients

TAPIOCA

One of its nutritional benefits is its supply of calories, vitamins and minerals that strengthen the immune system.

YEAST

An important source of high biological value proteins, B group vitamins, and minerals that contribute to protect the skin, the shine of coat and nails of your pet in a healthy manner. It also strengthens the immune system. Its high content of poorly fermentable carbohydrates and fibre favours the growth of intestinal flora, which improves the health of the gastrointestinal tract. Yeast is a great detox and regenerator of intestinal flora.

YUCCA EXTRACT

It improves intestinal health, since it contributes to the production of beneficial fatty acids and the elimination of ammonia, which reduces the odour of excrements.

SWEET POTATO

Sweet potato is a source of highly digestible carbohydrates and improves the palatability of food. It is rich in carotenes (provitamin A), vitamin E and folic acid.

INULIN

It helps to improve the digestive health due to its probiotic effects, since it allows to modulate the intestinal flora by stimulating the growth of gastrointestinal bacteria (bifidobacteria and lactobacilli). It strengthens the immune system and increases the bioavailability of minerals and B vitamins.

FISH/SALMON OIL

This is an ingredient with high contents of DHA and EPA (Omega 3 acids), cardiovascular protectors with arteriosclerotic properties, which favour the elasticity of arterial walls and decreases blood pressure and triglyceride and cholesterol levels.

CHICKEN OIL

This nutrient improves palatability. It is an excellent source of Omega 6 unsaturated fatty acids that help to maintain the skin in good condition and are recommended for a good cardiovascular health.

100% Natural

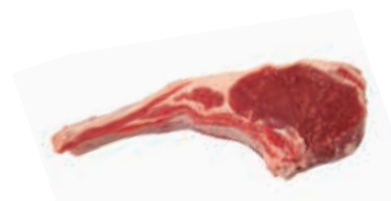

CHICKEN

This is an easily digestible ingredient that contains high biological value proteins, tryptophan, and is low-fat. It is a source of minerals and vitamins necessary for optimum growth and development.

LAMB

Meat with a high nutritional value and palatability due to its fat content. It has remarkable contents of iron and zinc, together with B group vitamins that are necessary for a proper functioning of the organism.

IBERIAN PORK

This is a source of healthy fats due to its high content of oleic acid. It provides B group vitamins and minerals, such as iron and zinc, of high availability: components that favour vitality and energy in daily life.

SALMON

It is rich in Omega-3 polyunsaturated fatty acids, which are essential and highly beneficial to maintain optimal health. Its content of tocopherols is a natural source of vitamin E, an excellent antioxidant essential to prevent autoxidation of fats and to maintain an excellent cellular health.

HERRING

Herring is an ingredient with lots of benefits thanks to its content of Omega 3 (EPA and DHA): cardiovascular and anti-arteriosclerotic properties. It improves smoothness, density and shine of coat. It also contributes to the brain development and to maintain good mental health.

Bravery

Bravery has been developed to prevent the most usual eating disorders of our pets and to improve their health and quality of life as well.

Bravery is the result of satisfying the most discerning palate, that of our pets.

The range of **Bravery** products meets all the nutritional requirements of our pets, according to their size and vital stage

Formats range from 600gr to 12kg for dogs and from 600gr to 7kg for cats. All of them have a **Top-aplix** airtight opening and closing system, which helps to keep the freshness and properties of the product for longer.

WHAT MAKES BRAVERY DIFFERENT?

GRAIN FREE

The consumption of some cereals such as wheat and soya, among others, can cause allergies in pets, resulting in dermatological and gastrointestinal clinical signs. Bravery selects tapioca, since it is a more easily digestible ingredient and provides highly absorbable hydrates. Its benefits include the supply of calories, fats, proteins and fibre.

SINGLE-PROTEIN

We use a single source of animal proteins for each product in order to reduce their allergenicity. We have 5 sources of animal proteins: chicken, lamb, Iberian pork, salmon, and herring.

NATURAL

The different ingredients that make up the Bravery range have been carefully selected, inspected and approved by our in-house laboratory. Guaranteeing the maximum quality and safety of the ingredients.

NATURAL ANTIOXIDANTS

All Bravery products contain high levels of natural antioxidants (tocopherols; vitamins A, E and C) that help to keep an excellent immune system.

GMO-FREE

In the manufacture of our products, we do not use any genetically modified ingredients, and this contributes to the protection of nature and its sustainability.

HYPOALLERGENIC

As it is a natural product, does not contain cereals and is made from a single source of animal protein, the risk of causing any type of allergy is minimal.

BRAVERY

DOG

IMMUNOLOGICAL SUPPORT

MOS + β -GLUCANS

The combined action of mananooligosaccharides (MOS) and β -glucans stimulates the immunitary system.

OCULAR HEALTH

ω 3 (DHA) + TAURINE

Taurine is an essential amino acid for vision, while DHA is necessary for the proper development of the retina.

INTESTINAL CARE

FOS + MOS + NATURAL FIBERS

The combined action of FOS as a prebiotic, MOS controlling pathogenic microorganisms and natural fibres (soluble and insoluble), strengthen the intestinal flora and promote digestive transit.

ANTI-OXIDANT FACTOR PLUS

SUPEROXIDE DISMUTASE (SOD⁺) +
B-CAROTENE

The higher content of SOD in the antioxidant complex together with B-carotene enhances the antioxidant action, protecting the senior mascots from the action of free radicals, which affect cell aging.

ORAL CARE

PEPPERMINT +
VEGETABLE FIBERS

The vegetable fibres produce a brushing action which, together with the mint, improves the oral hygiene of the animals, acting on the formation of tartar and bacterial plaque and reducing bad breath.

ARTICULAR CARE

GLUCOSAMINE + CHONDROITIN

Chondroitin and glucosamine are essential components of cartilage and crustaceans, respectively.

CARDIOVASCULAR HEALTH

ω 3 (EPA + DHA) + TAURINE

ω 3 fatty acids and taurine are cardiovascular protectors that help support heart function.

ENERGY OPTIMIZATION

L-CARNITINE +
HIGH FIBER CONTENT

L-carnitine helps to convert body fat into energy, preventing its accumulation and increasing the body's muscle mass. The higher fibre content in Bravery Light contributes to weight control.

SKIN & HAIR CARE

ω 3 + ω 6 + BIOTIN + ZINC

Biotin and zinc levels combined with fatty acids ω 3 and ω 6 improve the quality of the coat and help strengthen the skin against allergies or disease.

BRAIN HEALTH

ω 3 (EPA + DHA)

EPA and DHA fatty acids maintain proper development of the nervous system, helping to improve brain oxygenation in older animals while enhancing the learning ability of young animals.

ODOR CONTROL

YUCCA

Yucca helps to protect the intestine and liver against ammonia, thereby reducing the odour of the faeces.

COGNITIVE ACTION

ω 3 EPA/DHA + MCFA

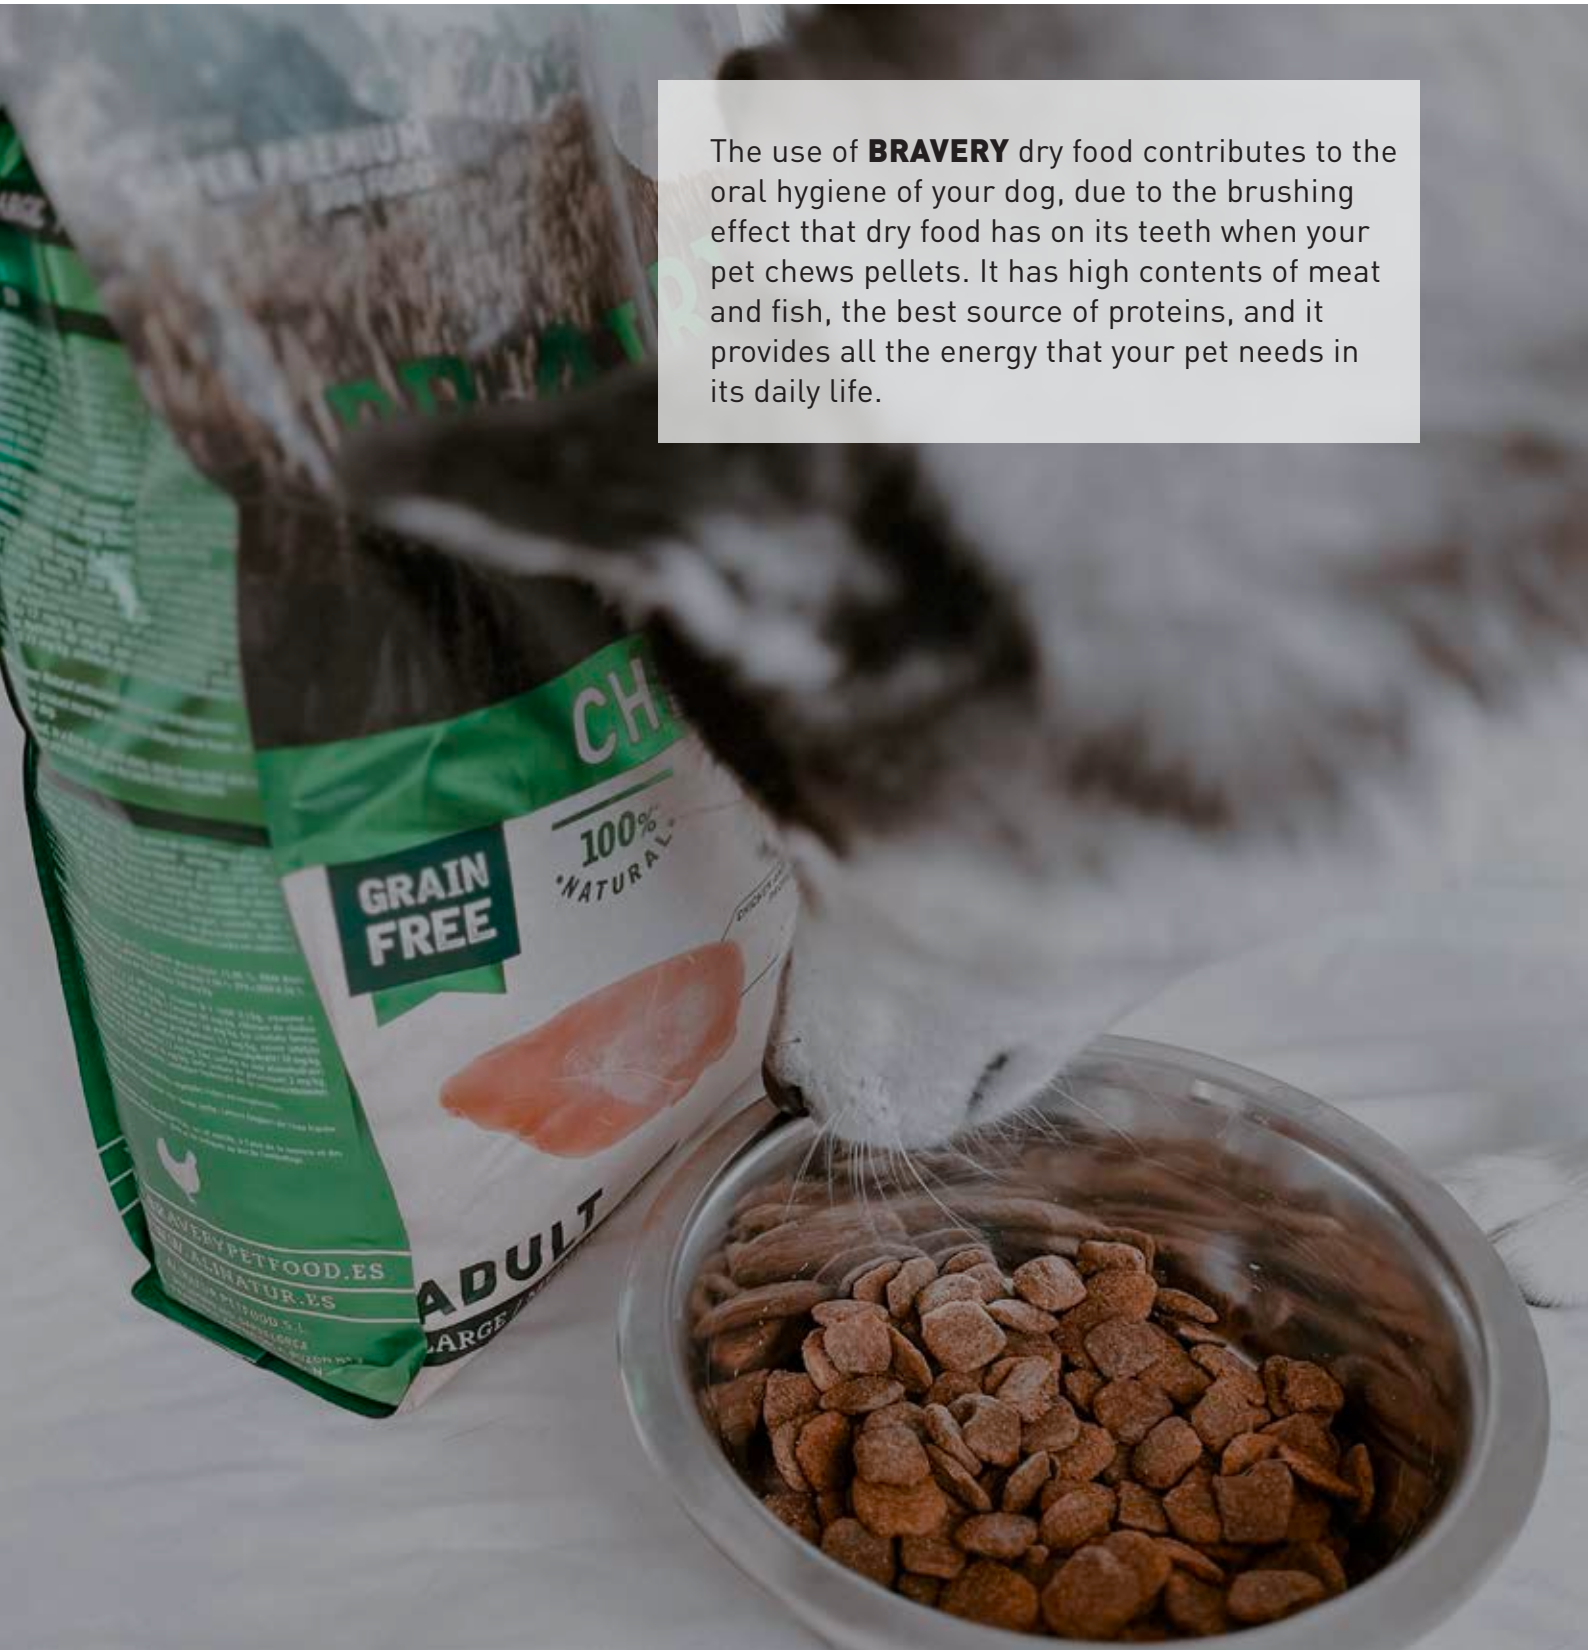

EPA and DHA fatty acids play neuroprotective and anti-inflammatory roles that help maintain cognitive function. Coconut oil (a source of medium-chain fatty acids) is an alternative source of energy for the brain, helping to restore its functionality.

***The most
natural and
healthy diet***

Dry Food

The use of **BRAVERY** dry food contributes to the oral hygiene of your dog, due to the brushing effect that dry food has on its teeth when your pet chews pellets. It has high contents of meat and fish, the best source of proteins, and it provides all the energy that your pet needs in its daily life.

Bravery

DOG

Bravery dog is produced to meet all the nutritional requirements of your dog, depending on its life stage, size, flavor and format:

LIFE STAGE		SIZE	FLAVOUR	FORMAT
PUPPY		Mini (0-10 months)	Chicken and Salmon	2/7Kg
		Medium-Large (0-12 meses)	Chicken and Salmon	2/7Kg
ADULT		Mini (1-7 years)	Chicken, Salmon, Lamb, Herring, Iberian Pork, Iberian Pork Light	2/7Kg
		Medium-Large (1-6 years)	Chicken, Salmon, Lamb, Herring, Iberian Pork, Iberian Pork Light	4/12Kg
SENIOR		Mini (Over 8 years old)	Herring	2/7Kg

Benefits

Chicken is ideal for any puppy, given that it is an easily digestible ingredient and it also contains high biological value proteins, which are necessary for optimum growth and development.

COMPOSITION: Dehydrated chicken meat, tapioca, chicken fat (source of Ω-6 fatty acids), hydrolyzed chicken protein, peas, yeast and yeast extract-Saccharomyces cerevisiae (source of mannan-oligosaccharides-MOS and β-glucans), hydrolyzed chicken liver, fish oil (source of Ω-3 fatty acids-EPA and DHA), carob pod, dehydrated whole egg, potato protein, sweet potato, beet pulp, inulin (soluble fiber from chicory, source of fructooligosaccharides - FOS), natural cellulose (source of insoluble fiber), minerals, soluble dietary fiber extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary, peppermint, green tea), hydrolyzed crustaceans (source of glucosamine), hydrolyzed cartilage (source of chondroitin), yucca, freeze-dried melon juice concentrate (rich in superoxide dismutase-SOD).

ANALYTIC CONSTITUENTS: Crude protein 31.00%, crude fat 20.00%, crude fiber 2.40%, crude ash 7.80%, calcium 1.40%, phosphorus 0.95%, moisture 9.00%.

NUTRITIONAL ADDITIVES: Vitamin A 24.000 I.U/kg, vitamin D-3 1.760 I.U/kg, vitamin E 500 mg/kg, vitamin C 220 mg/kg, biotin 2.200 mcg/kg, L-carnitine 100 mg/kg, choline chloride 1.980 mg/kg, taurine 1.300 mg/kg, iron (ferrous sulphate monohydrate) 66 mg/kg, iron (ferrous chelate of glycine hydrate) 13 mg/kg, copper (cupric sulphate pentahydrate) 5,5 mg/kg, copper (cupric chelate of glycine hydrate) 3,7 mg/kg, manganese (manganous sulphate monohydrate) 41 mg/kg, manganese (manganese chelate of glycine hydrate) 13 mg/kg, zinc (zinc sulphate monohydrate) 83 mg/kg, zinc (zinc chelate of glycine hydrate) 50 mg/kg, iodine (potassium iodide) 2,2 mg/kg, selenium (sodium selenite) 0,12 mg/kg, selenium (hydroxy analogue of selenomethionine) 0,12 mg/kg.

Technological additives: natural antioxidants (vegetable oils rich in tocopherols).

EPA+DHA 0.63%, glucosamine chlorhydrate 380 mg/kg, chondroitin sulphate 240 mg/kg.

Benefits

Chicken is an easily digestible ingredient that contains high biological value proteins and is low-fat. It is a source of minerals and vitamins necessary for optimum growth and development.

COMPOSITION: Dehydrated chicken meat, tapioca, poultry fat (source of Ω -6 fatty acids), peas, yeast and yeast extract-Saccharomyces cerevisiae (source of mannanooligosaccharides – MOS and β -glucans), fish oil (source of Ω -3-EPA and DHA fatty acids), hydrolysed chicken liver, sweet potato, carob beans, potato protein, dehydrated egg, sweet beet pulp, hydrolysed chicken protein, inulin (soluble chicory fiber, source of fructooligosaccharides - FOS), natural cellulose (source of insoluble fiber), minerals, soluble dietetic fiber extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary, peppermint, green tea), hydrolysates from crustaceans (source of glucosamine), hydrolysates from cartilage (source of chondroitin), yucca, concentrate of lyophilised melon juice (rich in superoxide dismutase-SOD).

ANALYTIC CONSTITUENTS: Crude protein 28.00 %, crude fat 17.00 %, crude fiber 2.40 %, crude ash 7.90 %, calcium 1.60 %, phosphorus 0.95 %, moisture 9.00 %.

NUTRITIONAL ADDITIVES: Vitamin A 22,000 IU/kg, vitamin D-3 1,600 IU/kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1,200 mg/kg, iron (monohydrated ferrous sulphate) 60 mg/kg, iron (iron chelate of glycine hydrate) 12 mg/kg, copper (copper sulphate pentahydrate) 5.5 mg/kg, copper (copper chelate of glycine hydrate) 3.4 mg/kg, manganese (manganese sulphate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulphate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxylated analogue of selenomethionine) 0.11 mg/kg.

Technological additives: natural antioxidants (vegetable oils rich in tocopherols).

EPA+DHA 0.57 %, glucosamine chlorhydrate 380 mg/kg, chondroitin sulphate 240 mg/kg.

METABOLIZABLE ENERGY: 3.900 KCAL/KG

Benefits

Our light Iberian pork is produced for those pets that are prone to gain weight, given that it is a low-fat and low-calorie food and includes a proper level of L-carnitine, a nutrient that helps to convert fat into energy.

COMPOSITION: Dehydrated Iberian pork meat, tapioca, peas, poultry fat (source of fatty acids Ω -6), pea fiber, natural cellulose (source of insoluble fiber), yeast and yeast extract-Saccharomyces cerevisiae (Source of mananoligosaccharides - MOS and β -glucans), sweet potato, carob beans, sweet beet pulp, fish oil (Source of Ω -3-EPA and DHA fatty acids), hydrolyzed pork protein, potato protein, inulin (soluble chicory fiber, source of fructooligosaccharides - FOS), minerals, soluble dietetic fiber extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary, peppermint, green tea), hydrolysates from crustaceans (source of glucosamine), hydrolysates from cartilage (Source of chondroitin), yucca, concentrate of lyophilized melon juice (rich in superoxide dismutase - SOD).

ANALYTIC CONSTITUENTS: Crude protein 30.00%, crude fat 12.00%, crude fiber 8.00%, crude ash 7.90%, calcium 1.60%, phosphorus 0.95%, moisture 9.00%.

NUTRITIONAL ADDITIVES: Vitamin A 22,000 I.U./kg, vitamin D-3 1,600 I.U./kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-Carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1.200 mg/kg, iron (ferrous sulfate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine hydrate) 12 mg/kg, copper (cupric sulfate pentahydrate) 5.5 mg/kg, copper (cupric chelate of glycine hydrate) 3.4 mg/kg, manganese (manganous sulfate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulfate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxy analogue of selenomethionine) 0.11 mg/kg.

Benefits

Herring is an ingredient with lots of benefits thanks to its content of Omega 3 (EPA and DHA): cardiovascular and anti-arteriosclerotic properties. It improves smoothness, density and shine of coat. It also contributes to the brain development and to good mental health.

COMPOSITION: Dried herring, tapioca, poultry fat (source of Ω -6 fatty acids), peas, yeast and yeast extract – *Saccharomyces cerevisiae* (source of mannanoligosaccharides – MOS and β -glucans), sweet potato, carob pod, beet pulp, fish oil (source of Ω -3-EPA and DHA fatty acids), potato protein, inulin (soluble chicory fibre, source of fructooligosaccharides – FOS), natural cellulose (source of insoluble fibre), minerals, soluble dietary fibre extracted from *Plantago ovata*, essential oils (oregano, cinnamon, clove, thyme, rosemary, mint, green tea), crustacean hydrolysate (Source of Glucosamine), cartilage hydrolysate (Source of Chondroitin), yucca, lyophilised melon juice concentrate (rich in superoxide dismutase–SOD).

ANALYTICAL COMPONENTS: Crude protein 28.00%, crude fat 17.00%, crude fibre 2.40%, crude ash 7.90%, calcium 1.60%, phosphorus 0.95%, moisture 9.00%,

NUTRITIONAL ADDITIVES: Vitamin A 22,000 IU/kg, vitamin D-3 1,600 IU/kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1,200 mg/Kg, iron (monohydrated ferrous sulphate) 60 mg/kg, iron (iron chelate of glycine hydrate) 12 mg/kg, copper (copper sulphate pentahydrate) 5.5 mg/kg, copper (copper chelate of glycine hydrate) 3.4 mg/kg, manganese (manganese sulphate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulphate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxylated analogue of selenomethionine) 0.11 mg/kg.

Benefits

Our light Iberian pork is produced for those pets that are prone to gain weight, given that it is a low-fat and low-calorie food and includes a proper level of L-carnitine, a nutrient that helps to convert fat into energy.

COMPOSITION: Dried Iberian pork, tapioca, peas, pea fibre, poultry fat (source of fatty acids Ω -6), natural cellulose (source of insoluble fibre), yeast and yeast extract-Saccharomyces cerevisiae (source of mannan-oligosaccharides - MOS and β -glucans), sweet potato, carob pods, beet pulp, fish oil (source of Ω -3-EPA and DHA fatty acids), hydrolysed pork protein, potato protein, inulin (soluble chicory fibre, source of fructooligosaccharides - FOS), minerals, soluble dietary fibre extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, clove, thyme, rosemary, sweet grass, green tea), hydrolysed crustaceans (source of glucosamine), hydrolysed cartilage (source of chondroitin), yucca, freeze-dried melon juice concentrate (rich in superoxide dismutase - SOD) dismutase - SOD).

ANALYTIC CONSTITUENTS: Crude protein 28.00%, crude fat 11.00%, crude fiber 8.50%, crude ash 7.90%, calcium 1.60%, phosphorus 0.95%, moisture 9.00%.

NUTRITIONAL ADDITIVES: Vitamin A 22,000 I.U./kg, vitamin D-3 1,600 I.U./kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1.200 mg/kg, iron (ferrous sulfate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine hydrate) 12 mg/kg, copper (cupric sulfate pentahydrate) 5.5 mg/kg, copper (cupric chelate of glycine hydrate) 3.4 mg/kg, manganese (manganous sulfate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulfate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxy analog of selenomethionine) 0.11 mg/kg.

Technological additives: natural antioxidants (vegetable oils rich in tocopherols).

EPA+DHA 0.40%, glucosamine hydrochloride 380 mg/kg, chondroitin sulfate 240 mg/kg.

Benefits

Salmon helps to strengthen the immune system. It is a natural source of Omega-3 fatty acids, which are essential to maintain optimal health. Its high content of vitamin D strengthens bones.

COMPOSITION: Dehydrated salmon, tapioca, poultry fat (source of fatty acids Ω -6), peas, yeast and yeast extract-Saccharomyces cerevisiae (source of mannan-oligosaccharides - MOS and β -glucans), sweet potato, carob pods, beet pulp, hydrolysed salmon protein, salmon oil (source of Ω -3-EPA and DHA fatty acids), potato protein, Inulin (soluble chicory fibre, source of fructooligosaccharides - FOS), natural cellulose (source of insoluble fibre), minerals, soluble dietary fibre extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary, herb, green tea), hydrolysed crustaceans (source of glucosamine), hydrolysed cartilage (source of chondroitin), yucca, freeze-dried melon juice concentrate (rich in superoxide dismutase - SOD).

ANALYTICAL COMPONENTS: Crude protein 26.00%, crude fat 15.00%, crude fiber 2.50%, crude ash 7.90%, calcium 1.60%, phosphorus 0.95%, moisture 9.00%.

NUTRITIONAL ADDITIVES: Vitamin A 22,000 I.U./kg, vitamin D-3 1,600 I.U./kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1.200 mg/kg, iron (ferrous sulfate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine hydrate) 12 mg/kg, copper (cupric sulfate pentahydrate) 5.5 mg/kg, copper (cupric chelate of glycine hydrate) 3.4 mg/kg, manganese (manganous sulfate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulfate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxy analogue of selenomethionine) 0.11 mg/kg.

Benefits

Herring is an ingredient with lots of benefits thanks to its content of Omega 3 (EPA and DHA): cardiovascular and anti-arteriosclerotic properties. It improves smoothness, density and shine of coat. It also contributes to the brain development and to good mental health.

COMPOSITION: Dried herring, tapioca, poultry fat (source of fatty acids Ω -6), peas, yeast and yeast extract – *Saccharomyces cerevisiae* (source of mannanoligosaccharides – MOS and β -glucans), sweet potato, carob pod, beet pulp, fish oil (source of Ω -3-EPA and DHA fatty acids), potato protein, inulin (soluble chicory fibre, source of fructooligosaccharides – FOS), natural cellulose (source of insoluble fibre), minerals, soluble dietary fibre extracted from *Plantago ovata*, essential oils (oregano, cinnamon, clove, thyme, rosemary, mint, green tea), crustacean hydrolysate (source of glucosamine), cartilage hydrolysate (source of Chondroitin), yucca, lyophilised melon juice concentrate (rich in superoxide dismutase – SOD).

ANALYTICAL COMPONENTS: Crude protein 26.00%, crude fat 15.00%, crude fibre 2.50%, crude ash 7.90%, calcium 1.60%, phosphorus 0.95%, moisture 9.00%.

NUTRITIONAL ADDITIVES: Vitamin A 22,000 I.U./kg, vitamin D-3 1,600 I.U./kg, vitamin E 460 mg/kg, vitamin C 200 mg/kg, biotin 2,000 mcg/kg, L-carnitine 60 mg/kg, choline chloride 1,800 mg/kg, taurine 1.200 mg/kg, iron (ferrous sulfate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine hydrate) 12 mg/kg, copper (cupric sulfate pentahydrate) 5.5 mg/kg, copper (cupric chelate of glycine hydrate) 3.4 mg/kg, manganese (manganous sulfate monohydrate) 38 mg/kg, manganese (manganese chelate of glycine hydrate) 12 mg/kg, zinc (zinc sulfate monohydrate) 76 mg/kg, zinc (zinc chelate of glycine hydrate) 46 mg/kg, iodine (potassium iodide) 2 mg/kg, selenium (sodium selenite) 0.11 mg/kg, selenium (hydroxy analogue of selenomethionine) 0.11 mg/kg.

Dry Food

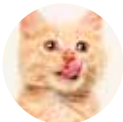

The use of **BRAVERY** dry food contributes to the oral hygiene of your cat, due to the brushing effect that dry food has on its teeth when your pet chews pellets. It has high contents of meat and fish, the best source of proteins, and it provides all the energy that your pet needs in its daily life.

Bravery

CAT

Bravery cat is produced to meet all the nutritional requirements of your cat, according to life stage, flavour and format:

LIFE STAGE		FLAVOUR	FORMAT
KITTEN (0-12 months)		Chicken and Salmon	2Kg
ADULT (1-8 years)	 Non-sterilized	Chicken, Salmon and Herring	2/7Kg
	 Sterilized	Chicken, Salmon and Herring	2/7Kg
SENIOR (More than 8 years)		Herring	2/7Kg

BRAVERY

CATS

IMMUNOLOGICAL SUPPORT

MOS + β -GLUCANS

The combined action of mannanoligosaccharides (MOS) and β -glucanes stimulates the immunitary system.

OCULAR HEALTH

ω 3 (DHA) + TAURINE

Taurine is an essential amino acid for vision, while DHA is necessary for the proper development of the retina.

INTESTINAL CARE

FOS + MOS + NATURAL FIBERS

The combined action of FOS as a prebiotic, MOS controlling pathogenic microorganisms and natural fibres (soluble and insoluble), strengthen the intestinal flora and promote digestive transit.

ANTI-OXIDANT FACTOR PLUS

SUPEROXIDE DISMUTASE (SOD⁺) +
 β -CAROTENES

The higher content of sod in the antioxidant complex together with β -carotene enhances the antioxidant action, protecting the senior mascots from the action of free radicals, which affect cell aging.

ARTICULAR CARE

GLUCOSAMINE + CHONDROITIN

Chondroitin and glucosamine are essential components of cartilage with beneficial effects on maintaining good joint health.

CARDIOVASCULAR HEALTH

ω 3 (EPA + DHA) + TAURINE

ω 3 fatty acids and taurine are cardiovascular protectors that help support heart function.

SKIN & HAIR CARE

ω 6 + ω 3 + BIOTIN

Biotin and zinc levels combined with fatty acids ω 3 and ω 6 improve the quality of the coat and help strengthen the skin against allergies or disease.

BRAIN HEALTH

ω 3 (EPA + DHA)

EPA and DHA fatty acids maintain proper development of the nervous system, helping to improve brain oxygenation in older animals while enhancing the learning ability of young animals.

ODOR CONTROL

YUCCA

Yucca helps to protect the intestine and liver against ammonia, thereby reducing the odour of the faeces.

URINARY HEALTH

CA:P:MG + NA + DHA

DHA (ω 3) has a natural anti-inflammatory effect against chronic renal insufficiency.

WEIGHT CONTROL

L-CARNITINE + FIBER + ENERGY

The higher content of L-carnitine, which promotes the transformation of body fat and prevents its accumulation, and of fibre, contribute to weight control in sterile cats.

Benefits

Chicken is an ingredient ideal for kittens, since it is an easily digestible ingredient and contains high biological value proteins, tryptophan, and is low-fat. It also contains DHA, a nutrient that contributes to the visual and brain development. The perfect balance of minerals, proteins and fatty acids contributes to the growth of strong muscles and bones.

COMPOSITION: Dehydrated chicken meat, tapioca, hydrolyzed chicken protein, poultry fat (source of Ω-6 fatty acids), peas, potato protein, hydrolyzed chicken liver, yeast and yeast extract-Saccharomyces cerevisiae (source of mannan-oligosaccharides - MOS and B-glucans), sweet potato, fish oil (source of fatty acids Ω-3-EPA and DHA), beet pulp, carob pod, dehydrated whole egg, minerals, natural cellulose (source of insoluble fibre), inulin (soluble chicory fibre, source of fructooligosaccharides-FOS), soluble dietary fiber extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary), yucca, hydrolyzates from crustaceans (source of glucosamine), hydrolyzates from cartilage (source of chondroitin), lyophilized melon juice concentrate (rich in superoxide dismutase - SOD).

ANALYTIC CONSTITUENTS: Crude protein 38.00%, crude fat 18.00%, crude fiber 1.90%, crude ash 7.80%, calcium 1.30%, phosphorus 1.10%, moisture 0.40%, magnesium 0.09% moisture 8.00%.

NUTRITIONAL ADDITIVES: Vitamin A 28,000 IU/kg, vitamin D-3 1,600 IU/kg, vitamin E 600 mg/kg, vitamin C 300 mg/kg, biotin 2,600 mcg/kg, L-Carnitine 120mg/kg, choline chloride 3,220mg/kg, taurine 2,000mg/kg, iron (ferrous sulphate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine, hydrate) 60mg/kg, copper (copper sulphate pentahydrate) 5mg/kg, copper (copper chelate of hydroxy analogue of methionine) 8 mg/kg, manganese (manganous sulphate monohydrate) 12 mg/kg, manganese (manganese chelate of hydroxy analogue of methionine) 18mg/kg, zinc (zinc sulphate monohydrate) 50mg/kg, zinc (zinc chelate of hydroxy analogue of methionine) 70 mg/kg, iodine (potassium iodide) 3.8 mg/kg, selenium (sodium selenite) 0.05 mg/kg, selenium (hydroxy-analogue of selenomethionine) 0.20 mg/kg.

Technological additives: antioxidants (vegetable oils rich in tocopherols).

EPA + DHA 0.50%, glucosamine hydrochloride 300 mg/kg, chondroitin sulfate 220 mg/kg.

Benefits

Salmon helps to strengthen the immune system. It is a natural source of Omega-3 fatty acids, which are essential to maintain optimal health. Its high content of vitamin D strengthens bones. Fish oil helps to keep a healthy skin and a shiny coat.

COMPOSITION: Dehydrated salmon, tapioca, poultry fat (source of Ω -6 fatty acids), peas, hydrolyzed salmon protein, potato protein, yeast and yeast extract-*Saccharomyces cerevisiae* (source of mannanooligosaccharides – MOS and B-glucans), beet pulp, carob pod, potato protein, dehydrated whole egg, fish oil (source of Ω -3-EPA and DHA fatty acids), minerals, natural cellulose (source of insoluble fiber), inulin (soluble fiber of chicory, source of fructooligosaccharides - FOS), soluble dietary fiber extracted from *Plantago ovata*, essential oils (oregano, cinnamon, cloves, thyme, rosemary, mint, green tea), yucca, hydrolyzates from crustaceans (source of glucosamine), hydrolyzates from cartilage (source of chondroitin), lyophilized melon juice concentrate (rich in superoxide dismutase - SOD).

ANALYTIC CONSTITUENTS: crude protein 32.00%, crude fat 16.00%, crude fiber 3.70%, crude ash 8.20%, calcium 1.00%, phosphorus 1.00%, moisture 8.00%

NUTRITIONAL ADDITIVES: Vitamin A 28,000 I.U./kg, vitamin D-3 1,600 I.U./kg, vitamin E 600 mg/kg, vitamin C 300 mg/kg, biotin 2,600 mcg/kg, L-carnitine 120 mg/kg, choline chloride 3,220 mg/kg, taurine 2.000 mg/kg, iron (ferrous sulfate monohydrate) 60 mg/kg, iron (ferrous chelate of glycine hydrate) 60 mg/kg, copper (cupric sulfate pentahydrate) 5 mg/kg, copper (copper chelate of hydroxy analog of methionine) 8 mg/kg, manganese (manganous sulfate monohydrate) 12 mg/kg, manganese (manganese chelate from hydroxylated methionine analog) 18 mg/kg, zinc (zinc sulfate monohydrate) 50 mg/kg, zinc (zinc chelate from hydroxylated methionine analog) 70 mg/kg, iodine (potassium iodide) 3.8 mg/kg, selenium (sodium selenite) 0.05 mg/kg, selenium (hydroxylated selenomethionine analog) 0.20 mg/kg.

Technological additives: Natural antioxidants (vegetable oils rich in tocopherols).

Sodium 0.60 %, magnesium 0.09 %, EPA+DHA 0.52 %, glucosamine hydrochloride 300 mg/kg, chondroitin sulfate 220 mg/kg.

Benefits

Herring is a food with a multitude of benefits, as it helps to improve skin and hair thanks to its Omega 3 and 6 fatty acids. It helps to maintain cholesterol thanks to its low saturated fat content, as well as contributing to the strengthening of the immune system and the development of the brain.

ANALYTICAL COMPONENTS: Dehydrated herring, tapioca, peas, potato protein, yeast and yeast extract-Saccharomyces cerevisiae (source of mannan-oligosaccharides - MOS and B-glucans), poultry fat (source of Ω-6 fatty acids), natural cellulose (source of insoluble fibre), sweet potato, beet pulp, carob pods, pea fibre, hydrolysed herring protein, minerals, sunflower oil (source of Ω-6 fatty acids), fish oil (source of Ω-3 fatty acids - EPA and DHA), Inulin (soluble fibre from chicory, source of fructooligosaccharides - FOS), algae oil (source of DHA - Ω-3), soluble dietary fibre extracted from Plantago ovata, essential oils (oregano, cinnamon, clove, thyme, rosemary, good herb, green tea), beta-carotene (source of vitamin A - antioxidant), yucca, hydrolysed crustaceans (source of glucosamine), hydrolysed cartilage (source of chondroitin), freeze-dried melon juice concentrate (rich in superoxide dismutase - SOD).

ADDITIVES: Crude protein 35.00 %, crude fat 12.00%, crude fibre 6.00 %, crude ash 6.70 %, calcium 0.90 %, phosphorus 0.90%, moisture 8.00%

NUTRITIONAL ADDITIVES: Vitamin A 28,000 I.U/kg, vitamin D-3 1,600 I.U/kg, vitamin E 600 mg/kg, vitamin C 300 mg/kg, biotin 2,600 mcg/kg, L-Carnitine 280 mg/kg, Choline chloride 3,220 mg/kg, Taurine 2.000 mg/kg, Iron (ferrous sulfate) 60 mg/kg, Iron (ferrous chelate) 60 mg/kg, Copper (cupric sulfate) 5 mg/kg, Copper (copper chelate) 8 mg/kg, Manganese (manganous sulfate) 12 mg/kg, Manganese (manganese chelate) 18 mg/kg, Zinc (Zinc sulfate) 50 mg/kg, Zinc (Zinc chelate) 70 mg/kg, Iodine (Potassium iodide) 3.8 mg/kg, Selenium (Sodium selenite) 0.05 mg/kg, Selenium (Hydroxy analog of selenomethionine) 0.20 mg/kg.

***Top-Quality
Ingredients***

Quality Ingredients

EXTRA VIRGIN OLIVE OIL

Extra virgin olive oil is a food with a millenary tradition, obtained naturally, being a pillar of the “Mediterranean Diet”. Ingredient with an important nutritional value (rich in oleic acid) and great antioxidant power (vitamin E, carotenes, polyphenols, among others).

PEAS

Ingredient that stands out for its content in proteins, phosphorus, potassium, thiamine, niacin and folates that contribute to maintaining body health.

CARROT

The carrot is a vegetable that contains carotenoids (beta-carotenes) and vitamin A that contribute to maintain visual health and with great antioxidant power.

FISH / SALMON OIL

Ingredient with high content in DHA and EPA (Omega 3 acids), cardiovascular protectors that have arteriosclerotic properties, favoring the elasticity of the artery walls.

TUNA

Tuna is a blue fish rich in Omega 3 fatty acids, a source of proteins of high biological value, fat-soluble vitamins such as D and water-soluble vitamins such as B6 and B12, minerals such as selenium and phosphorus. It has anti-inflammatory effects on the skin and coat.

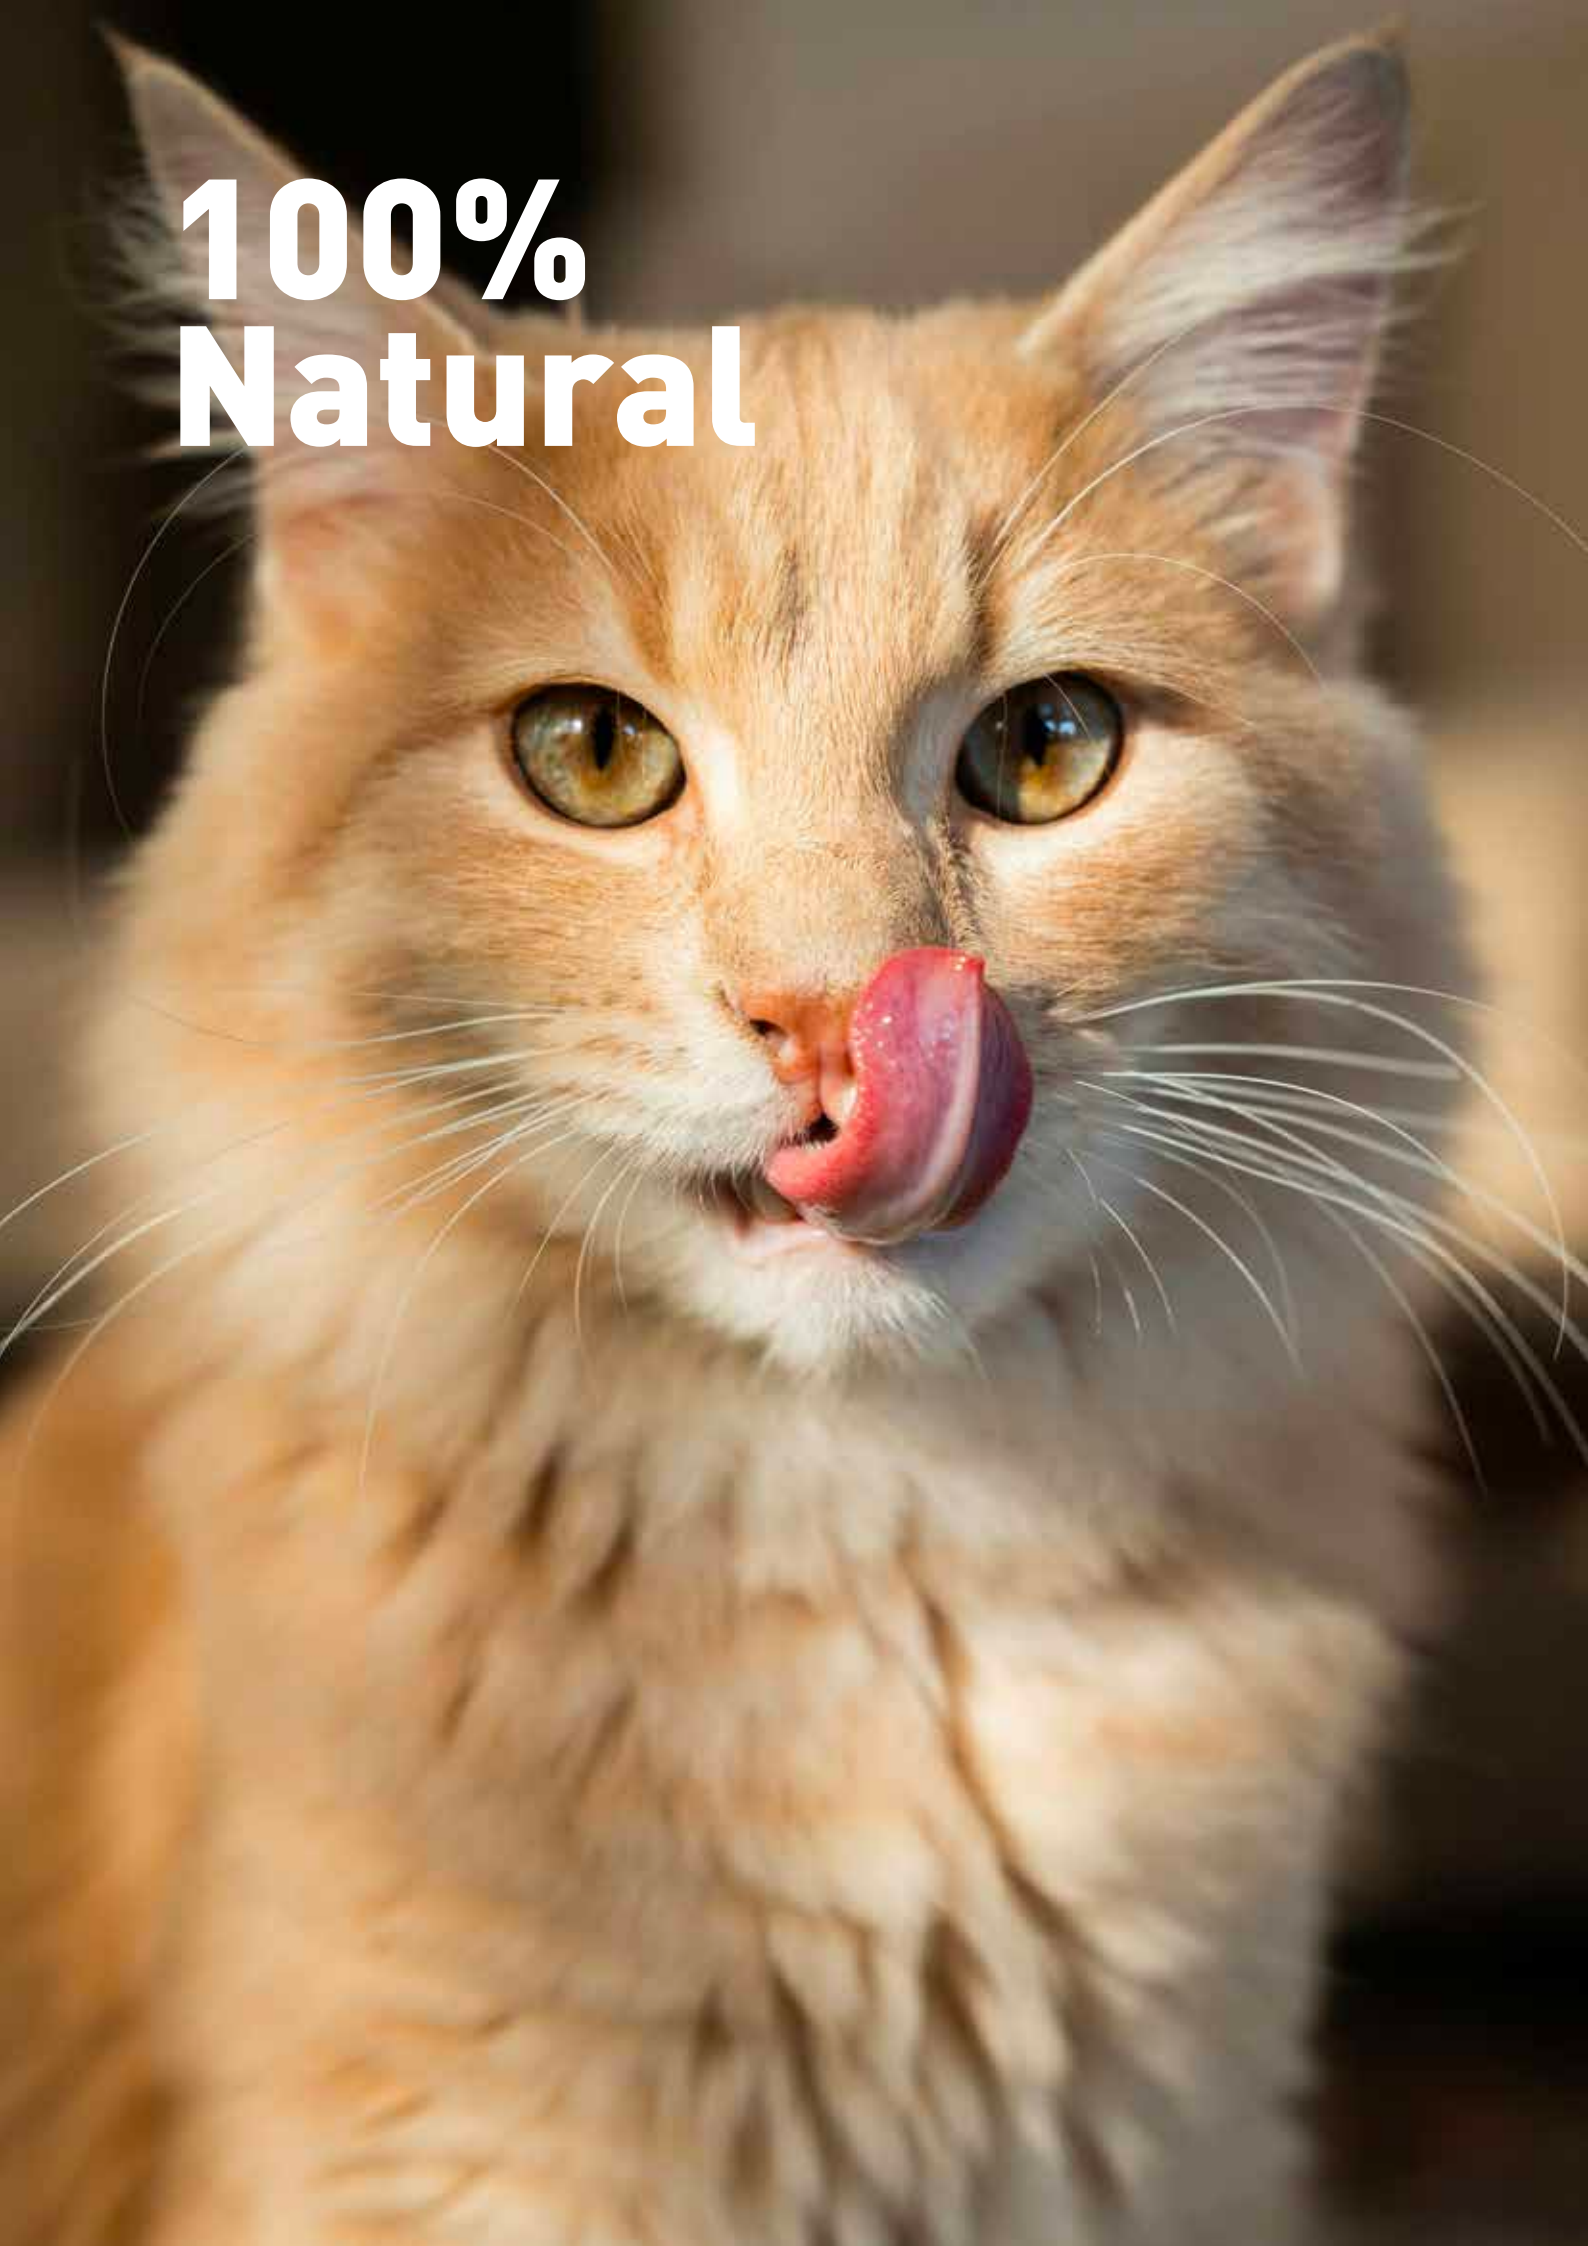

CHICKEN

Easily digestible ingredient that contains proteins of high biological value, tryptophan and is low in fat. Source of minerals and vitamins that are necessary for optimal growth and development.
